Entry requirements This course is for those who have completed other carpentry courses with OCSW or who have some experience of carpentry and using tools.

Course Intent This course will allow you to develop your basic carpentry skills while supporting biodiversity in your own garden. You will produce your own bug hotel, hedgehog house or bird box to take away at the end of the course and support a local wildlife charity by building an extra one for them. You will also learn about the science behind why it is so important to support the wildlife in our local area and the importance of conservation efforts locally.

How will this course be delivered? You will be working with your tutor to develop practical skills in carpentry and most of the course will take place through practical, hands on activity and demonstrations. There will also be theory based activities around biodiversity and conservation.

Will I need to study or practise outside the classroom? It is always useful to practice your skills between sessions. Your tutor may set some home learning for you to practice.

How will I know I'm making progress? Your tutor will set objectives for each session and give feedback on how you are progressing. You will agree personal targets as part of your Individual Learning Plan (ILP), and you will review your targets throughout the course to check your own progress.

What will I need for the course? You will need either a computer with Google Chrome or a Smart device (phone/tablet) with Google Chrome and the Google Meet apps installed and access to WIFI.

There are additional resources required for the course at an approximate cost of £10. Information will be provided at course induction.

Please bring a pen and notepad to each session.
