Ignite your child's curiosity about science with fun, hands-on activities led by experts!

Course Description:

Spark a love of learning in your family with our engaging Family Science workshops! Dive into the exciting world of science with your child through interactive activities led by experienced educators and scientists. Explore key scientific concepts in a way that's fun and easy to understand for curious young minds. This workshop is the perfect way to bond with your child and create lasting memories while fostering their scientific curiosity.

What will I learn?

This one-day workshop will be packed with interactive activities designed to spark your child's imagination and teach key scientific concepts such as :

- **Explore the properties of matter:** Experiment with states of matter, build slime, and learn about chemical reactions.
- **Unleash your inner engineer:** Design and construct bridges, explore the science of flight, and learn about forces and motion.
- **Become a nature detective:** Investigate the world around you, dissect a flower, and learn about the different parts of a plant.

How will I be assessed?

This workshop is designed for enjoyment and engagement, with a focus on practical learning and exploration. There are no formal assessments; however, facilitators will provide formative feedback throughout the activities to enhance learning.

Who is this course for?

This course is designed for families with children of all ages (there will be activities for everyone!), parents and carers interested in nurturing a scientific mind in their kids, and anyone who wants to ignite a child's curiosity about science – it's perfect for parents, carers, and those who work with children.

Progression Opportunities:

After completing this workshop, families can explore more in-depth science topics through:

- After-school science clubs
- Online science resources for children
- Science-themed museum visits
- Citizen science projects

Career or Job Enhancement Pathways:

This course can be a stepping stone towards careers like:

- Science teacher
- Science communicator
- Early years educator
- Children's activity leader at museums or science centres

How do I enrol?

To apply for this course online at www.ourcoursesouthwest.co.uk and simply click on the 'How to Enrol' button and complete the Enrolment Form and one of our customer service team will be in touch or call to speak to one of our friendly Learning Advisors on 01752 660713.

How will the course be delivered?

This is a practical course, and the sessions will include tutor-led demonstrations, learner-led group activities, instruction and repetition. These will form part of the delivery together with one-to-one support as required.

Will I need to practise outside the classroom?

You will be encouraged to review your notes between lessons to ensure maximum benefit from your course. It is always useful to practise your skills between sessions.

How will I know I'm making progress?

During the first session, your tutor will discuss your goals and current level in relation to the course. Based on this assessment, you will agree individual targets which you will record in your individual learning plan (ILP). You and your tutor will review your targets regularly to ensure that you are making progress; these will be written in your individual learning plan.

What will I need?

Please bring a notepad, and pen to each session. You may wish to bring a file for any handouts. A laptop with internet access is required for completion of coursework and home learning outside of the classroom.

Please note:

Most courses attract a subsidy from the Education and Skills Funding Agency (ESFA). It is a requirement of the ESFA that you complete various forms at different stages of your course, further information is available on request. Courses are subject to a minimum number of enrolments and could be cancelled if recruitment is low. In some cases, an alternative class at a different location may be offered.
